

Prep Check 5.

NOTE: For multiple choice and matching questions, the answer side is not provided, but you at least know what terms you should be able to define.

1. In backwashing a rapid sand filter, what is the typical percentage of bed expansion achieved?

[Choose one from a multiple choice]

2. Match up the following:

- a. Uniformity coefficient _____
- b. Effective size _____
- c. Air binding _____
- d. Air scouring _____
